

ASE PROJECT SPRING 2017

- **Project Title:** PLANOVAC (means “Scheduler” in Czech language)

Team – 10: Ravali Bolem (UMKC ID: 16231463; Class ID: 7)

Ashwini Gutha (UMKC ID: 16233065; Class ID: 33)

Pranathi Gopidi (UMKC ID: 16233917; Class ID: 29)

Sathya Sai Deepthi Katta (UMKC ID: 16231371; Class ID: 41)

- **Project Goal and Objectives:**

- **Motivation:**

Students tend to forget their class timings, important assignment deadlines etc due to their hectic schedules. The proposed application works as a scheduler and reminds them of their important activities such as sending alerts when their classes start, alerts regarding submission deadlines etc.,

- **Significance/ Uniqueness:**

This application can be particularly very useful for students. Students will be able to register all their important tasks in the application and the application sends periodic alerts to users regarding the status of these tasks. There are many other scheduler apps in the market. But none of those are specific to students.

- **Objectives:**

- Students can register all their class schedules in the application and set the time for alerts (For eg. 10 mins before the class starts).
- Then the application notifies the user regarding important tasks.
- It reads all the contacts from the user’s phone and allows collaboration with those who possess an account in this application.
- The students can then initiate individual or group chats.
- Even the instructors can also communicate with the subjects through discussion forums.
- This application also displays the location of various classrooms according to our class schedule.

- **System Features:**

Web application

Web Browser: Google Chrome

Internet connection

- **Related Work:**

UMKC Blackboard

When I Work

Schedule Planner

Team Snap

- **Backup Project:**

StoreBucks:

- This application enables you to search for various products which are available in different stores like Aldi, price chopper, walmart etc.
- User can search for the nearby stores by entering the zip codes.
- It also allows a person to grab the coupons and check for the offers if any.
- It also provides user to create a shopping list and add sales items to track them easily.
- The main goal of this project is to create awareness regarding price drops, discounts and any other new offers.
- It serves as a publicity tool for various grocery and retail stores.
